

## Table of Contents

### PREFACE

- 77 Preface from the Editors

### NEWS

- News at a Glance**
- 78 Developments in the Management of Shock Using Resuscitation Fluids  
*Jay Han and Alexandra Mardimae*
- Determination of the Structure of B30.2/SPRY Binding Domain May Lead to Novel Treatments for HIV/AIDS  
*Adrian Fawcett*
- Cancer Breakthrough: The HPV Vaccine  
*Michelle Levy*
- Women and COPD: A National Wake-Up Call  
*Melissa de Souza*

### VIEWS

- Health Policy and Economics**
- 82 Healthcare Management: Reconceptualizing Physician Roles  
*Bobby Yanagawa and Peter Tanuseputro*
- 84 Pharmacists Allowed Limited Prescribing in Alberta  
*Adrian Fawcett*

### CLINICAL CASES

- Morning Report**
- 85 A Case of Pancytopenia in an HIV-positive Patient  
*Christopher Dainton*
- 89 Dorsal Hand Friction Injury: A Degloving-like Injury Due to Shear Forces in a Motor Vehicle Accident  
*Sunshine J. Giesbrecht and Paul A. Binhammer*
- 91 Poly-my-what? An Unusual Case of Weakness and EMG Abnormalities  
*Hanna Bielawska and Stephen Shadowitz*

### Quick Diagnosis

- 95 Case 1  
*Jennifer Singerman and Liesly Lee*
- 96 Case 2  
*Carrie B. Lynde, John N. Kraft and Jennifer Uptis*
- Clinicopathological Correlation**
- 101 Li-Fraumeni Syndrome  
*Adam Durbin, Sonia Nanda, Adam Shlien and David Malkin*

### FEATURES

- Historical Review**
- 107 From Leeching to Anaphrodisiacs: Treatments of Epilepsy in the Nineteenth Century  
*Haowei Sun*
- International Health**
- 111 Convulsive Epilepsy – Perspective From Africa  
*Ikenna O. Onwuekwe*
- Complementary and Alternative Medicine**
- 113 A Brief Introduction to Complementary and Alternative Medicine for the Medical Trainee  
*Gordon McSheffrey and Gina Yip*
- Current Medical Perspectives**
- 117 Dr. Michael V. Sefton: Bioengineering from Bench to Bedside  
*Ali Okhowat*
- Book Review**
- 119 The Body Hunters: Testing New Drugs on the World's Poorest Patients  
*Brodie Ramin*
- 121 Health Systems in Transition: Canada  
*Andrew J. Perrin*

**Cover Artist: Julian Kirk-Elleker, B.Sc.** Julian obtained his undergraduate degree in molecular biology and genetics at the University of Guelph. After graduating, Julian decided to pursue a career in medical illustration and animation. He attended Toronto School of Art for one year to refine his artistic skill and is currently a second-year student in the Master in Biomedical Communications Program in the Faculty of Medicine at the University of Toronto. His research project focuses on using 3D animation and computer simulation to visualize the microevolutionary process of antibody-affinity maturation.
